New Jersey Work Environment Council's

Safe Work, Safe Care
a healthcare workers
training project

Safe Work, Safe Care
is funded by the
New Jersey Department of Labor and
Workforce Development

WEC's Safe Work, Safe Care Project

Healthcare workers face a wide range of workplace hazards, including ergonomic and needlestick injuries, exposures to chemicals and hazardous drugs, radiation, airborne diseases, latex allergy, needlesticks, and violence in the workplace.

The goal of the New Jersey Work Environment Council's (WEC) *Safe Work, Safe Care* Project is to create and maintain safe, healthy work environments for healthcare workers and patients. *Safe Work, Safe Care* promotes workers and managers working together, and stresses the valuable role of joint labor/management health and safety committees that rely on group problem-solving strategies to identify, analyze and reduce and/or eliminate hazards.

Safe Work, Safe Care encourages healthcare facilities to use a "systems" approach to health and safety that is supported by comprehensive reporting of injuries, efficient and thorough follow-up, and consistent program evaluation.

Safe Work, Safe Care provides quality, participatory training using a methodology that improves the problem solving and critical thinking skills of participants.

Current trainings topics include:

- Preventing Workplace Violence
- Strategic Planning for Joint Health & Safety Committees
- Strategic Planning for Union Health & Safety Committees
- Systems of Safety
- Chemical Hazards
- Material Safety Data Sheets
- Hazardous Drugs
- Needlestick Prevention
- Post-Exposure Procedures

The New Jersey Work Environment Council (WEC) is an alliance of labor, community and environmental organizations working together for safe, secure jobs and a healthy, sustainable environment. WEC links workers, communities, and environmentalists through training, technical assistance, grassroots organizing, and public policy campaigns to promote dialogue, collaboration and joint action.
