

To Governor Christie, State Legislators, and Members of Congress:

We are the 99% of Americans who are united for good jobs and healthy communities.
I urge you to:

- ① **Support and strengthen sensible safeguards** that all corporations must follow so our families, communities, and environment are protected and responsible businesses are not at a disadvantage.
- ② **Support the Jobs21! action plan** that will put millions of Americans to work and save billions of dollars by...

Modernizing our schools to make them energy efficient, safe, and technologically up-to-date.

Increasing energy efficiency in homes and other buildings.

Supporting American manufacturing of sustainable, "green" products and other needs.

Investing in transportation and communications systems for the 21st century.

Producing cleaner energy through seed money and incentives for wind power, solar power, and other renewable sources.

***Stand Up For Good Jobs & Healthy Communities,
Not Wall Street & Corporate CEOs***
